FACULTY.

REV. CHARLES COLLINS,

PRESIDENT AND PROFESSOR OF NATURAL SCIENCE.

EPHRAIM E. WILEY,

PROFESSOR OF ANCIENT LANGUAGES AND LITERATURE.

PROFESSOR OF MATHEMATICS AND NATURAL PHILOSOPHY.

**PROFESSOR OF AGRICULTURAL CHEMISTRY AND SCIENTIFIC
FARMING.**

LAURENCE B. SHEFFEY,

TUTOR.

Rev. Joseph Haskew,

STEWARD AND FARMER.

Students.

NAMES.				RESIDENCES.
Samuel G. Allen,	-	-	-	Smyth county.
William H. Anthony,	-	-	-	Lynchburg.
Joel Bays,	-	-	-	Russell county.
Armstrong Beattie,	-	-	-	Washington county.
Hamilton R. Bogle,	-	-	-	Wythe county.
Reece T. Bowen,	-	-	-	Smyth county.
James Byars,	-	-	-	Brook Hall.
John G. Cecil,	-	-	-	Montgomery county.
William P. Cecil,	-	-	-	Tazewell county.
John W. Chastain,	-	-	-	Washington county.
Benjamin Clark,	-	-	-	"
David B. Clark,	-	-	-	"
John H. Clark,	-	-	-	"
Andrew J. Cunningham,	-	-	-	Fayetteville, Tenn.
Bennett K. Cunningham,	-	-	-	Washington county.
Noah Cornutt,	-	-	-	Grayson county.
William Cureton,	-	-	-	Newport, Tenn.
Benjamin F. Davis,	-	-	-	Smyth county.
Lorenzo D. Dunbar,	-	-	-	Giles county.
Henry Edmundson,	-	-	-	Tazewell county.

Thomas G. Witten,	-	-	"
Samuel K. Witten,	-	-	"
James Wynn,	-	-	"

Total, . . . 100.

Miscellaneous Information.

The Departments of Instruction connected with this Institution are: the *Collegiate Department*, and the *Grammar School* or *Preparatory Department*. Information respecting each of these may be found under its appropriate head.

Collegiate Department.

Students pursuing the Collegiate course will be arranged in four classes: viz. the Freshmen, Sophomore, Junior and Senior Classes, with a course of study, requiring in ordinary cases a period of four years. Candidates for admission to the Freshman Class, must be well acquainted with Arithmetic on the inductive system, (Colburn's or Emerson's); English Grammar, Geography, Ancient and Modern History, Latin Grammar, (Andrew's and Stoddard's,) Latin Reader, Virgil, (six books and the Bucolics,) Anthon's Sallust, Cicero's Select Orations, Dillaway's Roman Antiquities and Mythology, Fisk's Grammar, and Jacob's Greek Reader through the prose.

Where these particular books have not been studied, their equivalents will be required.

The studies of the Collegiate course, are divided into departments; with a Professor at the head of each.

At present, there are six Departments, viz.

I. Moral Science and Belles Lettres.

II. Mathematics, Natural Philosophy, and Astronomy.

III. Natural Science.

IV. Ancient Languages and Literature.

V. Modern Languages.

VI. Agricultural Chemistry and Scientific Farming.

This classification, and the following course of studies, are made in reference to the prospective operations of the College. The present being the first year, Professors have been elected to but two of the above departments, but arrangements are making to fill them as fast as the means of the College permit, and its interests require.

The course of study, and the plan of instruction, are substantially the same with those of the most respectable Colleges in our country, nor is it designed materially to depart from principles which time has established, and whose wisdom, long experience has confirmed. In order, however, more fully to incorporate the Manual Labor System, into our operations, and direct the efforts of the students to the great *practical* duties of life, the Trustees have established a Professorship of Agricultural Chemistry and Scientific Farming. The interests of this section of the State are eminently agricultural, and no greater benefit, it is believed, can be conferred on the students, who are crowding to our

halls, than by a course of theoretical and practical instruction combined, to qualify them better to develop the Agricultural resources of the State. A Professor will be sought for this department, possessing the requisite scientific and practical qualifications, to assume the entire management of the Manual Labor Department.

The course of study connected with the Departments of Modern Languages and Agricultural Chemistry, is not yet matured, but will receive early attention.

Course of Study.

DEPARTMENT OF MORAL SCIENCE AND BELLES LETTRES.

Elocution—Porter's Analysis.

Jameison's Rhetoric.

Hedge's Logic.

Mental Philosophy.

Wayland's Elements of Moral Science.

Paley's Natural Theology.

Paley's Evidences of Christianity.

Wayland's Political Economy.

Bayard's Constitution of the United States.

Weekly Exercises during the whole course, in Composition and Declamation.

DEPARTMENT OF MATHEMATICS AND NATURAL PHILOSOPHY.

Day's Algebra.

Legendre's Geometry (Davis' Edition.)

Logarithms and Plane Trigonometry.

Mensuration, Superfices and Solids.

Spherical Trigonometry.

Davies' Analytical Geometry.

Mensuration of Heights and Distances.

Navigation.

Surveying and Levelling.

Differential and Integral Calculus.

Olmsted's Natural Philosophy.

Astronomy.

Lectures in Natural Philosophy and Astronomy.

DEPARTMENT OF NATURAL SCIENCE.

Turner's Chemistry.

Sheperd's Mineralogy.

Geology.
 Smellie's Philosophy of Natural History.
 The instruction in this department will be conducted by the double method of Lectures and Recitations

DEPARTMENT OF ANCIENT LANGUAGES AND LITERATURE.

LATIN.—Gould's Ovid, with strict attention to Prosody and Mythology.
 Latin Tutor.
 Folsom's Livy.
 Gould's Horace.
 Cicero de Amicitia and de Senectute.
 Kingley's Tacitus.
 Latin Compositions.
 Latin Declamations.
GREEK.—*Græca Majora*, Vol I.
 Excerpta Historica.
 Excerpta Miscellanea.
 Excerpta Rhetorica.
 Excerpta Critica.
 Greek Composition.
 Greek Declamation.
Græca Majora, Vol. II.
 Tragedies.
 Lyries, &c.
 Homer's Iliad, (5 Books.)
 Æschines and Demosthenes de Corona.

GRAMMAR SCHOOL.

Owing to the infancy of our operations, the regular College Classes have not yet been organized, and the Grammar School only has been in operation. The studies here pursued, are those which are necessary for entering upon the full Collegiate course, and have been before prescribed. Such students, however, as do not contemplate taking the full course, can, in addition to the elementary subjects previously specified, receive instruction in the principles of Algebra and Geometry, Agricultural Chemistry, Mensuration, Surveying, Navigation, Rhetoric, Elocution, Composition, Forensics, and, in fine, in all the branches of a thorough and extensive academical education.

TERMS AND VACATIONS.

There are two Sessions of the School in the year, each followed by a vacation. The first, or Fall Session, will hereafter commence on the fourth Wednesday of August, and close the second Wednesday of January. The second, or Spring Session, will commence the first Wednesday of March, and close the second Wednesday of August.

SUMMER VACATION—Two weeks.

WINTER do. Eight weeks.

EXAMINATION.

There will be an Annual Public Examination at the close of the Spring Session, which is the close of the Collegiate year, at which time the classes will be examined in all the branches to which attention shall have been given during the year.

The Examination will be conducted under the direction of a Committee of literary gentlemen, appointed by the Faculty.

The Examination for the present year will take place at the end of the present Session, the 30th and 31st days of January, and will be closed by an Exhibition.

EXPENSES.

Tuition, (payable in advance,) per Session, is \$10. Board at present is rated at but \$1.00 per week. There will be a small charge annually for printing Catalogues, general repairs, &c.

Students furnish their own beds, bedding, towels, and necessary room furniture, except bedsteads. In addition to the tuition, each student, on entering, is required to pay \$10 in advance for board. At a recent meeting of the Trustees, the subject of expenses was considered, and it was resolved, that after the present Session, the charge for board, including fuel, washing and room rent, shall be \$1.50 per week.

MANUAL LABOR DEPARTMENT.

This Department is considered one of the most important features of the Institution. There is connected with the Establishment, a Farm consisting of about 600 acres, on which the students labor 3 hours each day. The time appropriated to study and recitations is from 5 A. M., to half-past 12 P. M. The afternoon, from 1 o'clock to 4, is devoted to labor by all the students who are under the supervision and direction of the Steward. The evening from 7 o'clock to 9, is employed in study. It is the design, as early as practicable, to erect work-shops, in which a portion of the students can be profitably employed, in various branches of the Mechanical Arts. Many, by their labor, have been enabled to pay a large proportion of their board bill; and health, good order, and sound morality, have been augmented and secured, by this invaluable and indispensable branch of a perfect System of Education.

An appropriation has been made to furnish an excellent set of Chemical and Philosophical Apparatus, which will be procured and ready for use at the commencement of the next Session. There is already a respectable Library, and daily accessions of valuable books, are rapidly increasing its worth. The collection of a Cabinet of Minerals has also been commenced, and there are already a large number of valuable and interesting specimens.
